OSM INTEGRATED DAIRY FARMS PVT. LTD.

Corporate Profile & Investor Introduction

Planning-stage overview | November 2026

Executive overview

OSM Integrated Dairy Farms Pvt. Ltd. is planning an integrated Jersey dairy enterprise in the Kopargaon / Ahilyanagar region of Maharashtra. The proposed campus combines herd management, breeding and veterinary care, feed systems, milk processing and resource recovery.

Development concept

The enterprise is designed for a phased expansion from an initial 2,000 adult Jersey cows toward a long-term target of approximately 5,000 adult cows. These are planned capacities, not current operational claims.

Core infrastructure

The development concept includes ventilated cow barns with central feeding aprons, calf and heifer accommodation, rotary milking, an in-house IVF/ET laboratory, veterinary services, a bull station, silage storage, TMR preparation and a milk processing facility.

Product portfolio

The proposed product portfolio includes bottled milk, curd, paneer, table butter and ghee. Product volumes, labeling, pricing and commercial availability remain subject to operational and regulatory validation.

Sustainability and circular systems

The project concept includes water-storage ponds and rainwater harvesting, water treatment, floating solar photovoltaics, a Bio-CNG plant and organic fertilizer recovery. Final capacities, approvals and implementation phasing remain subject to detailed engineering.

Contract farming

The proposed feed-supply approach includes coordinated green-maize contract farming within a planned local radius, supported by harvest logistics and silage-making infrastructure.

Investor and partner engagement

OSM welcomes discussions with prospective strategic partners, equipment suppliers, technical collaborators and investors. This introductory profile is not an offer of securities, a financial forecast or an investment solicitation. A detailed project report and verified commercial information may be shared through appropriate company channels.
